

For Immediate Release

7/26/17

NeuroPsychiatric Hospitals will be opening a new hospital in Crown Point, Indiana. The new hospital will be named NeuroBehavioral Hospital and have 74 inpatient beds. This hospital will be one of a few hospitals in the country that is designed to treat the psychiatric disorders of patients with significant medical and neurological diseases. The hospital will primarily treat patients from Northwest Indiana and greater Chicago. NeuroBehavioral Hospital will be located at 9330 Broadway, Crown Point and is scheduled to open in early spring of 2018. The hospital will have up to 200 employees and approximately 18 providers in psychiatry, internal medicine and neurology.

Christy Gilbert, president and board member of the parent company NeuroPsychiatric Hospitals, stated “We are happy to be building this state of the art hospital in a great community such as Crown Point. We have provided treatment to patients from Northwest Indiana and greater Chicago for many years at our other hospitals with the patients often traveling great distances for this specialized care. We are proud to offer our services locally at our Crown Point hospital for patients from this region”.
